Objective

To assess the composition, pricing, and engagement of apps on the Google Play Store — and to identify where user attention actually concentrates versus where app supply is highest. The analysis turns a large, raw app dataset into a decision-ready view for anyone deciding where to build, publish, or compete.

Approach & Tools

Data was cleaned, prepared, and queried in **SQL**, then modeled and visualized in **Tableau**. The dashboard combines nine linked views built with calculated fields, context filters, and top-N logic, using bubble, waterfall, pie, treemap, scatter, and dual-axis line charts.

The Full Dashboard

A single interactive canvas linking pricing, engagement, content rating, and top-app views.

Content rating of Apps based on the Reviews

Share of reviews by content rating — 'Everyone' dominates at 58.2%

2 · App supply and user engagement don't line up

By count, the catalogue is dominated by **Family (1,972 apps)** and **Game (1,144 apps)**. Yet the highest engagement comes from Communication and Social apps — the most crowded categories are *not* the ones capturing the most attention.

Number of apps in each category

Category	
ART_AND_DESIGN	65
AUTO_AND_VEHICLES	85
BEAUTY	53
BOOKS_AND_REFERENCE	231
BUSINESS	460
COMICS	60
COMMUNICATION	387
DATING	234
EDUCATION	156
ENTERTAINMENT	149
EVENTS	64
FAMILY	1,972
FINANCE	366

3 · Engagement is concentrated in a handful of giants

A small set of platforms captures a disproportionate share of reviews: **Instagram (266M)**, **WhatsApp (207M)**, **Messenger (170M)**, **Subway Surfers (166M)**, and **Facebook (156M)** sit far above the field.

Top 10 apps based on Reviews using Context Filter

Category	App	
COMMUNICATION	WhatsApp Messenger	207,348,304
	Messenger â€” Text and Video Chat for Free	169,932,272
FAMILY	Clash of Clans	44,881,447
	Clash Royale	23,125,280
	Candy Crush Saga	22,419,455
GAME	Subway Surfers	166,331,958
	Clash of Clans	134,677,334
	Candy Crush Saga	134,573,681
	8 Ball Pool	85,201,288
	Clash Royale	69,405,018
SOCIAL	Instagram	266,241,989
	Facebook	156,286,514
	Snapchat	68,045,010
SPORTS	8 Ball Pool	14,184,910

Top apps by review volume, ranked within category using a context filter

4 · Installs are dominated by Google's own apps

Among top free apps by installs, the leaderboard is almost entirely Google-owned — **Google Photos, News, and Drive each at ~4B installs**. First-party distribution is a decisive advantage at the top of the install curve.

Category of Apps Installed based on Content Rating

Average reviews by content rating, with top-rated apps, price/review spread, and top free apps by installs

5 · Pricing is cheap by default, with a novelty-driven tail

Most categories cluster at low prices. The high-price tail is driven by novelty "I am Rich"-style apps that command high prices but attract **near-zero reviews** — high price, no real engagement.

Category of Apps based on their Price

Categories sized and shaded by review volume — Finance, Lifestyle, and Family carry the most weight

Top 50 Apps by Average Price and Reviews

Top 50 apps by average price vs. reviews — the priciest apps draw almost no engagement

6 · Top-rated apps skew to games and learning

The highest-rated apps are led by **ROBLOX**, **CBS Sports**, and **Duolingo**, followed by 8 Ball Pool and Candy Crush Saga — a blend of gaming and habit-forming apps.

Top 10 Apps by Rating

Dashboard Views at a Glance

View	Chart type	What it shows
------	------------	---------------

Category by Price	Bubble	Pricing weight across categories, shaded by review volume
Avg Reviews by Category	Waterfall	How review volume accumulates, Communication & Social leading
Content Rating by Reviews	Pie	Share of reviews across content-rating bands
Category × Content Rating	Matrix	Install intensity within each content-rating band
Top Apps by Reviews	Context filter	Highest-reviewed apps ranked within category
Top Apps by Rating	Bar	Highest-rated apps overall
Price vs. Reviews (Top 50)	Dual-axis line	Relationship between price and engagement
Apps per Category	Ranked table	Catalogue composition by app count
Top Free Apps by Installs	Ranked table	Highest-install free apps

Bottom line

The Play Store rewards broad, general-audience apps, and attention concentrates in Communication and Social categories and a small set of dominant platforms — even though Family and Game apps flood the catalogue by count. Installs at the top are shaped by first-party distribution, and higher prices buy no engagement advantage. For a new entrant, the data argues for competing on engagement in high-attention categories rather than on volume in the most crowded ones.
